Summary of Qualifications

Senior software developer with experience in developing web based applications written in Java and Angular. I have solid experience in back end development alongside with a good knowledge in front end development.

Aware of all the phases of software development life cycle, system integration and transformations.

I worked in many transformation and integration projects. I'm enthusiastic to be up to date with new technologies and how it fits the business needs, so I am seeking a position that challenges, increase and enhance my technical experience.

Professional Experience

Senior Software Developer
Etisalat, UAE
December 2014 - Present

I joined the real time fulfillment team (service activation and provisioning) as a senior software developer. My day to day duties encompass taking requirements from business and solution teams and implement these requirements and features as per agreement in the existing web applications. In addition to that, supporting running applications and customer issues.

Recently I started to lead a small team. My duties are to discuss solutions and features and guide my team implementing the requirement within the timeline.

The business mainly is providing telecom services for SMB and enterprise customers.

Java2EE Developer
SiliconExpert, Cairo
October 2012 - October 2014

Joined as a junior Java2ee developer. My role was to develop web applications using GWT and Java2ee, Hibernate, OpenAM, OpenDJ. I also joined the big data team for some projects related to logs and analysis which we used Hbase and Apache Flume.

The business mainly was for providing electronic parts data and search to enterprise customers.

Tools and Technologies

Backend: Java, Spring Boot, Hibernate, Maven, JWT and more...

Frontend: Angular, Typescript, ES6+, CSS, SASS, NPM, Bootstrap, and more...

Service Layer: RESTful and SOAP

Database: Oracle, MySQL, and MongoDB (hands on)

Software Development and Collaboration Tools: Git, Bitbucket, and Jira

OS: Windows and linux.
